(54) Title: SYSTEM FOR CODING ALPHABET PRONUNCIATION

### Key Symbol Chart

- dot** = dot under letter means 'lower case' sound. Placed between letters, then blend the 'lower case' letter sounds.
- dash** = DASH UNDER LETTER MEANS CAPITAL LETTER SOUND, BLEND WHEN EXTENDED.
- square** = when a square surrounds a letter/s, then no sound from that/those letter/s
- tilda** = match numbered tilda for new sound
- e** = letter change

<b>aow</b>  fowl  round  proud  soup cow	<b>ar</b> draft draught  dollar doctor path
<b>er</b> early  pleasure  birth  occur person	<b>ooe</b>  roo  spoon  trew true nooies
<b>or</b> all  caught  court tall law	<b>ou</b>  took  could  push cushion

alphabet

 CAPITAL LETTERS - A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

(57) Abstract: Provided is a system for coding letters in an alphabet for word pronunciation. The system includes a first code indicator (12) for association with letters for indicating a lower case letter sound; a second code indicator (14) for association with letters for indicating an upper case letter sound; a third code indicator (16) for association with letters for indicating a silent letter sound; and a fourth code indicator (18) for association with letters for indicating use of a sound varied from the upper or lower case sound, and having a variation sign for indicating that the associated letter or letters are for a sound varied from the lower case or upper case letter sound of the associated letter or letters, and a variation symbol for indicating a predetermined variation sound for the associated letter or letters. The first and second code indicator may be associated with two or more letters for indicating blending of the sounds of the associated letters. The system may be incorporated in a computer program and may include sound generating means arranged to generate an appropriate sound signal for the or each of the associated code indicator and words.
